DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by **Lebel, et al., Mann, et al., or Causey, III, et al.** The cited patents disclose infusion systems having a reservoir, a pump, a microphone for receiving voice sound, a microprocessor, and a source of electrical power.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 and 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Lebel, et al., in view of Mann, et al., Causey, III et al., Haueter, et al., and Hochman, et al.** As stated above the Lebel, et al., Patent discloses an infusion system having a reservoir, a pump, a microphone for receiving voice sound, a microprocessor, and a source of electrical power. Concerning the enhancements disclosed by the applicant in the claims in question, the teachings of Mann, et al., Causey, III et al., Haueter, et al., and Hochman, et al., demonstrate the conventionality of the subject matter disclosed in said claims. Accordingly, it would not be unreasonable to suggest that for a person of ordinary skill in the art, the use of said enhancements to modify the apparatus disclosed by Lebel, et al., would have been considered an obvious design choice.
